

Do More with Less

– Less Paper that is

▶ Introducing DYMO File™ Software *The smarter way from paper to digital™*

The DYMO File™ Difference

Patent-pending barcode scanning technology – *only available in DYMO File™* – is a superior solution for dealing with multi-page, multiple documents. Process stacks of documents quickly and easily. No more scanning one document at a time!

Unlike other scanning software set up for occasional single-document scans, DYMO File™ software was built to process stacks of documents efficiently and easily.

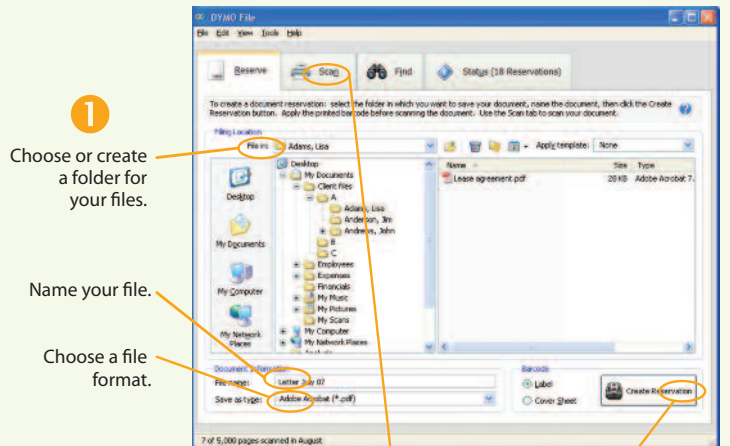

Harness the power of a digital office with DYMO File™ software:

- ▶ Save documents as searchable PDFs, Microsoft® Word or Excel files, powered by ABBYY™ Fine Reader™
- ▶ Quickly find documents with the DYMO File™ find tool
- ▶ Conveniently access your digital files when you need them or take them with you on your laptop.
- ▶ Share documents by email or over a network and reduce reliance on faxes and couriers.
- ▶ Enhance the privacy and security of files – no more sensitive documents left on fax machines.

System Requirements

- ▶ Windows Vista, XP, 512MB RAM, 215MB free disk space.
- ▶ Works with TWAIN-based and network 'scan-to-file' enabled scanners with automatic document feeder.
- ▶ Not compatible with flatbed scanners.

How it works – Easily

1
Choose or create a folder for your files.

Name your file.

Choose a file format.

3

Scan all your barcoded documents in one stack. DYMO File™ saves and files your documents automatically using the documents' barcodes.

2

"Create a Reservation" prints a unique barcode for your document.

DYMO File™ Software Office Edition:

Scan up to 5000 pages
each month
Item # 1738590
